

Sawdust Wood Pallet Hot Press Machine

Welcome to buy Sawdust Wood Pallet Hot Press Machine from Senyu. Every request from customers is being replied within 24 hours. We design and produce the Sawdust Wood Pallet Hot Press Machine for more than 6 years. The press wood pallet is a good alternative for the traditional wood pallet, it can save your budget, stock space and shipping cost by choosing the. When you have regular demand of the pallet, it is better to install the Sawdust Wood Pallet Hot Press Machine, and produce the press wood pallet locally, it will greatly reduce the cost by mass production locally. Most of our products are export to European, American, Asian countries and we look for long term partners in

all countries in all areas.

Product Introduction

China Sawdust Wood Pallet Hot Press Machine Factory Directly Supply. Senyu is a large-scale Sawdust Wood Pallet Hot Press Machine manufacturer and supplier in China. To satisfy the customers' over-expected pleasure, we've our strong group to supply our greatest over-all provider which incorporates promoting, revenue, coming up with, output, quality managing, packing, warehousing and logistics for OEM Factory for China Hot Press Wood Shavings Chips Sawdust Block Making Machine Production Line for Wood Pallet Feet Block, Adhering to the business philosophy of 'customer first, forge ahead', we sincerely welcome clients from at home and abroad to cooperate with us. OEM Factory for China Sawdust Block Making Machine, Sawdust Block Hot Press Machine, For more than ten years experience in this filed, our company has gained high reputation from home and abroad. So we welcome friends from all over the world to come and contact us, not only for business, but also for friendship.

China Sawdust Wood Pallet Hot Press Machine Manufacturers and Suppliers

Product Introduction of Sawdust Wood Pallet Hot Press Machine

The Sawdust Wood Pallet Hot Press Machine, includes wood chipping machine molding press machine, crushers, dryers, glue mixers, storage bins, etc. The production line has been designed by our company for many years of production experience, with good stability, high production efficiency, low energy consumption, and flexibility. It is convenient to change the press molds, can

produce various specifications of pallets, easy to install, does not require basic positioning. This machine has a reasonable design and structure. And we can send our worker to install or provide video instruction on how to install it. And good after sales service, we also produce the press wood pallet, so we can solve any possible problems during production.

Specification of Sawdust Wood Pallet Hot Press Machine

The core part of the sawdust wood pallet hot press machine is the moulding press machine

Equipment Introduction: The moulding press is the core equipment for moulded pallet production. The equipment is energy-saving, stable, easy to operate, occupies a small area, and can be used at any site; the structure is reasonably designed, and the mold can be changed according to the required pallet specifications; the processing cycle of one pallet is about 360 seconds, and one machine can produce 200 pallets per day. It can be matched with other auxiliary equipment to realize fully automatic production.

ITEM	UNIT	Data
Working pressure	Mpa	18-20
Output pressure	T	1000
Main oil cylinder diameter	mm	400
Main oil cylinder quantity	pcs	4
Cylinder stroke	mm	600
Maximum size of pallet	mm	1300×1200
Motor power	KW	11
Weight of machine	T	23
Machine dimension	am (L×W×H)	3300×1600×3400
Production capacity	pcs/24H	200

Features of Sawdust Wood Pallet Hot Press Machine

- (1) Equipment structure: unique internal structure with good strength, rigidity and precision keeping.
- (2) hydraulic system: with independent hydraulic system, using two-way cartridge valve, small volume and light weight, compact structure, small flow resistance, large flow, sensitive action, reliable work, good sealing performance, easy maintenance, long service life and other characteristics; working pressure can be adjusted within the parameters.
- (3) Control system: power operation one cabinet, can realize automatic or manual control.
- (4) Full-automatic control mode: press the automatic start button, automatically complete a tray pressing molding process, automatically complete the finished product out of the mold automatic palletizing to reduce manual handling. It can be switched to manual mode, and the manual button controls the ram rising, falling and unloading etc.
- (5) Safety device: Motor control part has thermal protector, circuit breaker, etc. to protect motor overload from damage and overcurrent short circuit protection. There are independent relief valves for cylinder rise and fall to ensure that the pressure is not overloaded. Overpressure protection: the set pressure is reached to stop working, playing the role of overpressure protection.

Applications of Sawdust Wood Pallet Hot Press Machine

The Sawdust Wood Pallet Hot Press Machine is used to produce high quality press wood pallet, it is a good alternative of the traditional wood pallet. It can use in the all the industries using traditional wood pallet, and we can customize the size and design to meet your requirement. It has a wide range of uses, suitable for packaging, transportation, and turnover of building materials, electrical, hardware, food, chemicals, furniture and machinery together with goods, and are especially suitable for container trucks (container trucks). It can be used for trains, automobiles, airplanes and ships for mechanized loading and unloading operations. It can also be used as a backing board for docks, shopping malls, warehouses and cargo stacks. It is an ideal tool for warehousing, exporting and logistics.

Advantage of Sawdust Wood Pallet Hot Press Machine

Our company focuses on the production of sawdust wood pallet hot press machine, and launches of a molding machine with superior performance and extra-large pressure design, producing molded pallets with better strength, which are loved by customers at home and abroad.

- (1) Higher pressure: the actual working pressure reaches 1000T.
- (2) Can improve product quality: better pallet strength and relatively smoother surface.
- (3) Large size: the maximum processable size is 1300×1200mm.
- (4) Good stability, super high-cost performance.
